

# EVIPLAC

## BACTERIAL PLAQUE INDICATOR

- **It is a product based on fucsina, with the power to color the bacterial plaque, in clean permanent teeth. Its color contrasts with the teeth natural color**

## INDICATION

- To color the bacterial plaque, making it visible

## PRESENTATION

➤ **SOLUTION:**  
10ml flask for topic application

➤ **TABLETS:**  
Box with 60 tablets  
Box with 20 blisters  
(with 6 tablets each)

## **BENEFITS**

- Makes easier the plaque localization and helps in the hygiene instruction, once it shows the areas that have more bactericide plaque concentration
